

LEVEL BEST[®]

ULTRA HIGH SOLIDS FLOOR FINISH

A single coat of this floor finish is so continuous that it acts as a sealer and a finish. A second coat is necessary only if the flooring has been poorly maintained or otherwise abused. This ultra high solids floor finish is a tough and flexible metal cross-linked acrylic, formulated to dry to a brilliant gloss. Buffing is not required to bring out a shine. However, buffing as a part of regular maintenance procedures prolongs the life of the floor.

This finish is non-yellowing and detergent resistant. It is easily repairable. Worn-out traffic areas can be recoated at anytime without stripping. Removal of this finish is easy by using an active amine or ammoniated floor stripper.

FEATURES

- Time tested polymer technology
- Outstanding slip resistance
- Positioned as a value floor finish
- Acts as a sealer and finish in one
- Designed for high traffic
- High speed burnishable

RELATED BENEFITS

- Long lasting, deep, lustrous gloss
- Reduces liability potential
- Outstanding features for an average price
- Saves time and cost of labor
- Excellent gloss and scuff resistance
- For a conventional maintenance program

AREAS OF USE -

Use with electric burnisher maintenance routines

- Restaurants, hotels, motels, offices
- Hospitals, nursing homes, doctors offices
- Schools, universities, child care centers
- Grocery stores, malls, retail stores

TO USE -

Apply finish in a uniform, thin coat to stripped floor. Two to four coats are recommended for initial application. **For applications, see label for complete directions and use only as directed.**

SPECIFICATION DATA

Available Sizes - 4/1G, 5G, 55G	Physical State - Liquid
Color - White emulsion	Fragrance - Acrylic
Total solids - 24.5%	Metal Interlocked - Yes
Initial Gloss - Excellent	Burnisher Response - Excellent
Slip Resistance - Exceeds ASTM 2047	Traffic Area - High
Specific Gravity - 1.04	pH - 8.1
